

dexo

**Unified Products.
Simplified Trading**

**An Extended Decentralised Exchange, Built
on the Principle of First-Ever C-Dex Protocol**

Decentralized Exchange(DEX) is not the complete solution!

Thus, the majority of people stay away from DEX and crypto!

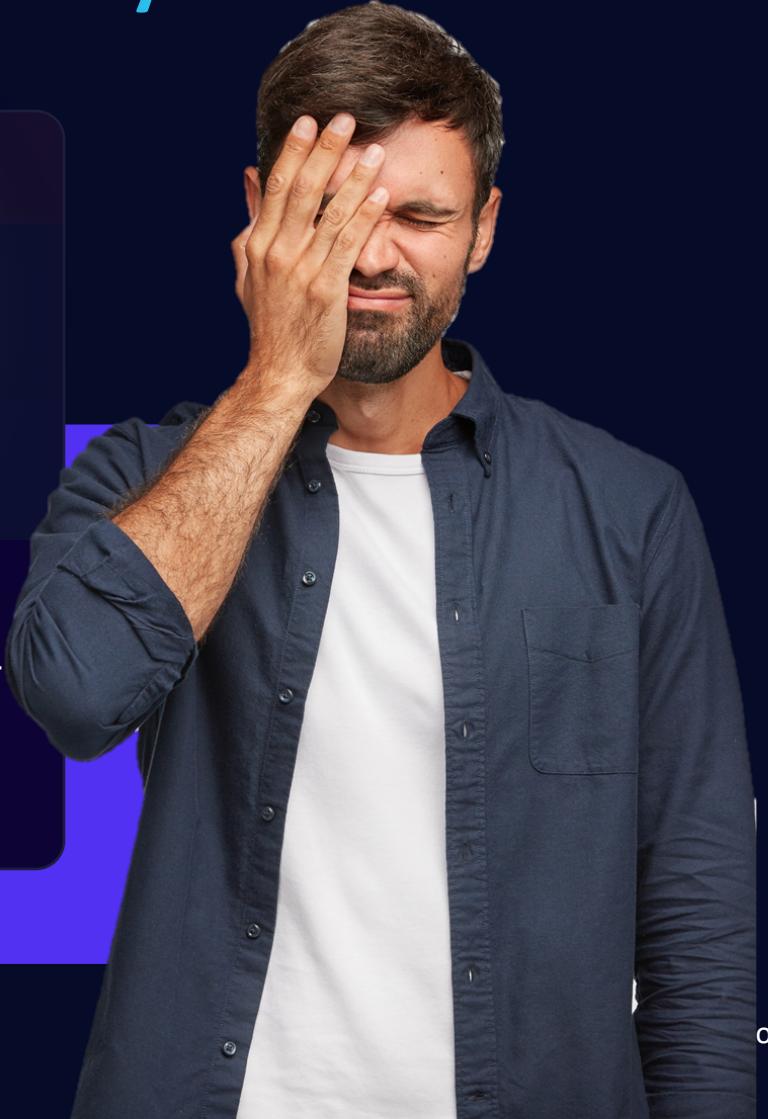

People have to compromise for simply wanting to accumulate more money

Currently, **users are charged higher** than the real price of a coin as coin prices are decided via Liquidity Pool

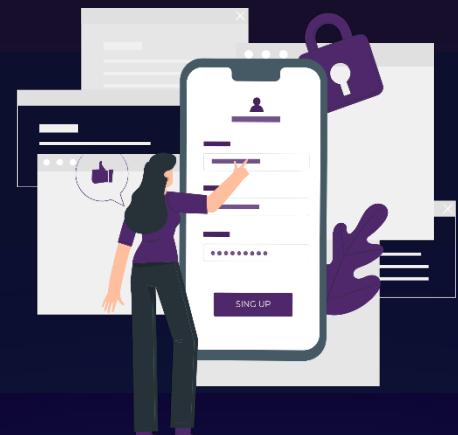

Users lack advanced trading functionalities that cater to different order types like stop losses, market/margin orders

What if the customers could have...

A one-stop platform consisting of a wide spectrum of DeFi products

Access to decentralized products offering the pros of existing centralized alternatives

A service that lowers the entry barrier for DeFi participants

Say Hello to Dexo

A new-gen intermediate blockchain ecosystem that harnesses C-Dex, a decentralized cryptocurrency exchange, to bridge that gap between centralized and decentralized worlds

Best of Both worlds!

Users will enjoy zero spreads and deep liquidity offered by DEXs and access to advanced order types like limit, market, stop-loss, and take-profit

Ease of Operation

Users can perform all DeFi activities like swapping, farming, mining, & staking easily by connecting their wallet sans KYC/ getting their account activated

Fast

Users will experience greater speed while performing all his transactions

Transparency

Users will have complete control over their digital assets, private keys, & funds without any compromise on their anonymity

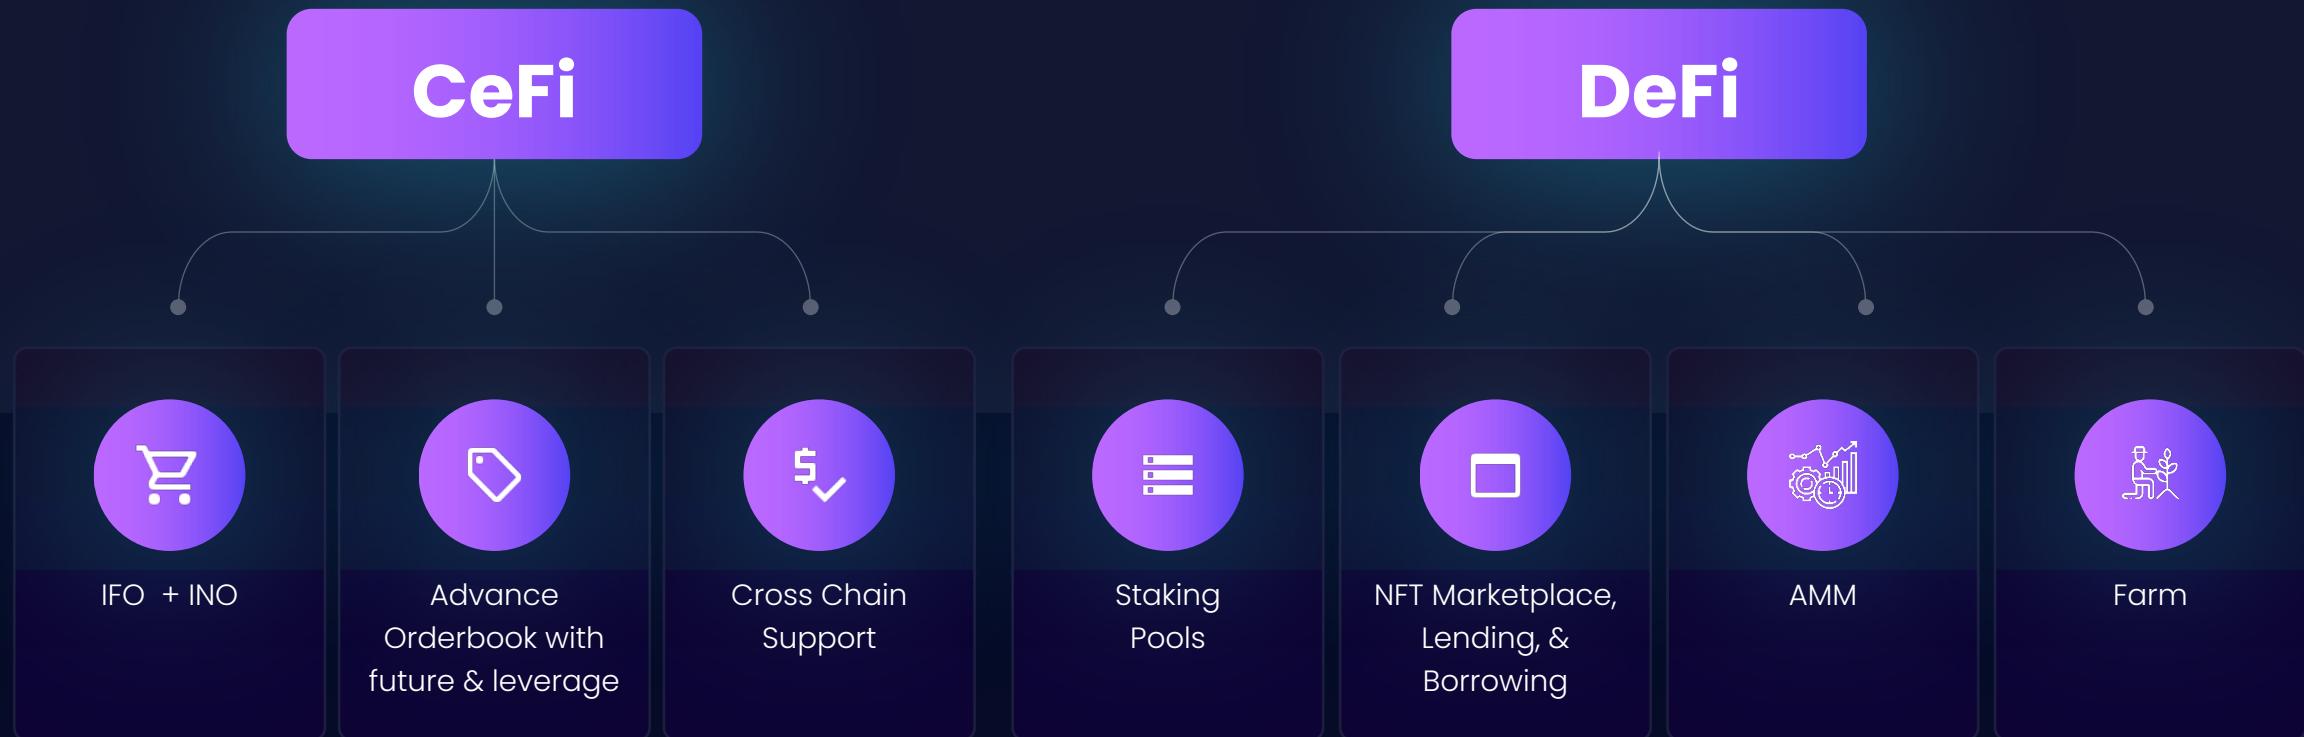

Holistic, Unique, Secure, & Convenient

We use the latest innovation in blockchain technology to bring ease and convenience to our users

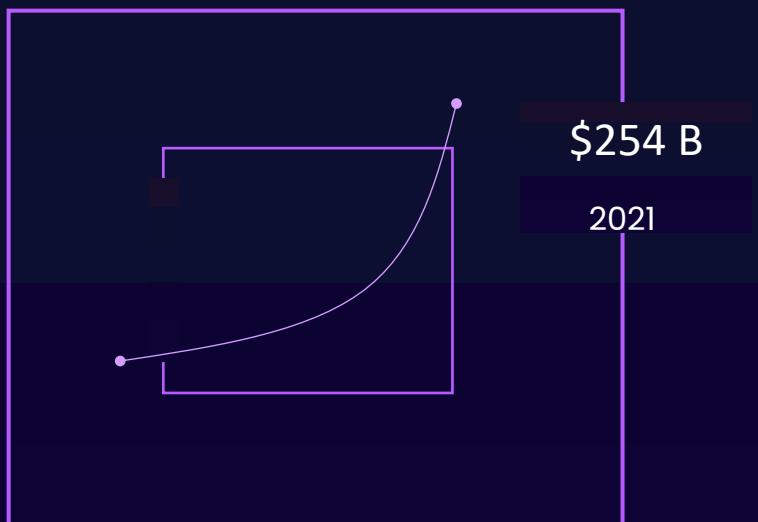

Dexo is a one-stop solution for all user needs

The market opportunity is huge!

Market Value of DEX with AMM protocols

\$5B

Avg. crypto daily trading volume
on DeFi platforms

\$80B

Avg. crypto daily trading volume
on CeFi platforms

Target Demographics

September 2022

Total \$75M

Our M.O.A.T: C-DEX

C-Dex is built on Binance Smart Chain, a well-reputed blockchain that runs parallel to the Binance Chain and provides several benefits

Benefits of BSC

Cheap transaction fees

High-performance speed

Cross-chain DeFi mechanism
boosting DeFi interoperability

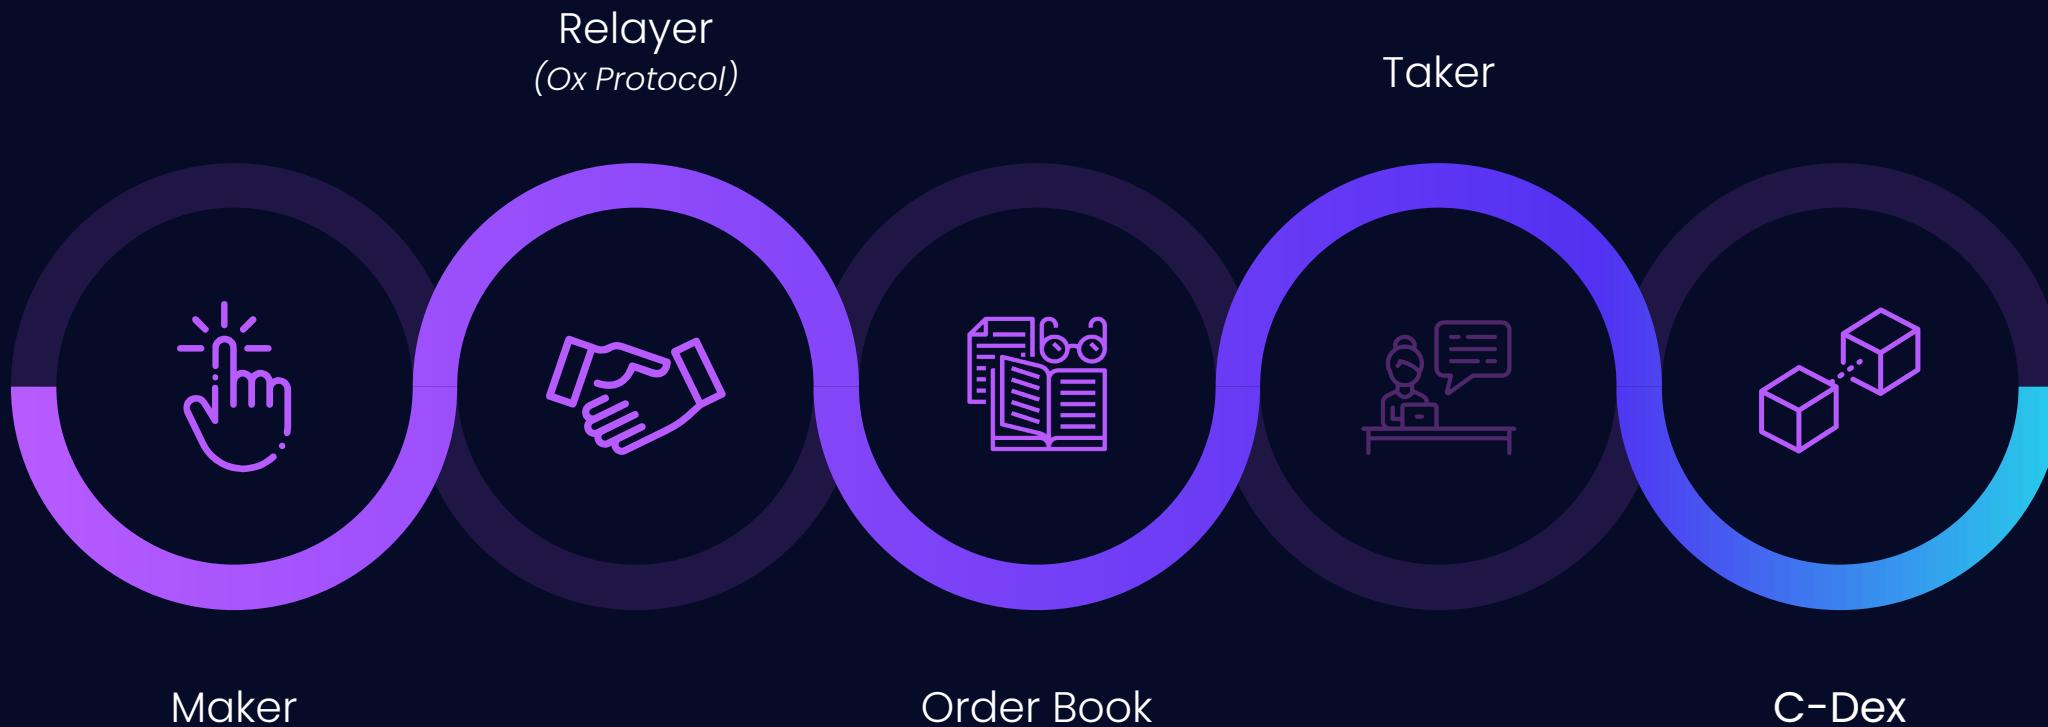

Supportive ecosystem
for new projects

Supports high speed, cheap.
And secure protocols

How do we work?

Our Roadmap

Our Roadmap

Token Usability

DEXO is the native BEP-20 utility and governance token of the C-Dex protocol. It can be paired with multiple currencies tradable on the C-Dex exchange

Users can use the tokens for

Staking

Gaining rewards by staking the token

Fee

For paying exchange transactions and platform fees

Rewards

All current and future rewards/incentives will be in form of Dexo Token

Community Governance

For voting and selecting proposals

Development Phases

The overall development will be released in a phased manner:

Dexo's Revenue Model

(a.) Trading fees from AMM and Orderbook

Dexo will earn income as trading fees on amount traded on AMM and Orderbook feature of its platform. However, 90% of the trading fees will be given to liquidity providers as liquidity rewards.

(c.) Trading fees from Gamification

Dexo will earn a certain income as trading fees from its gamification feature.

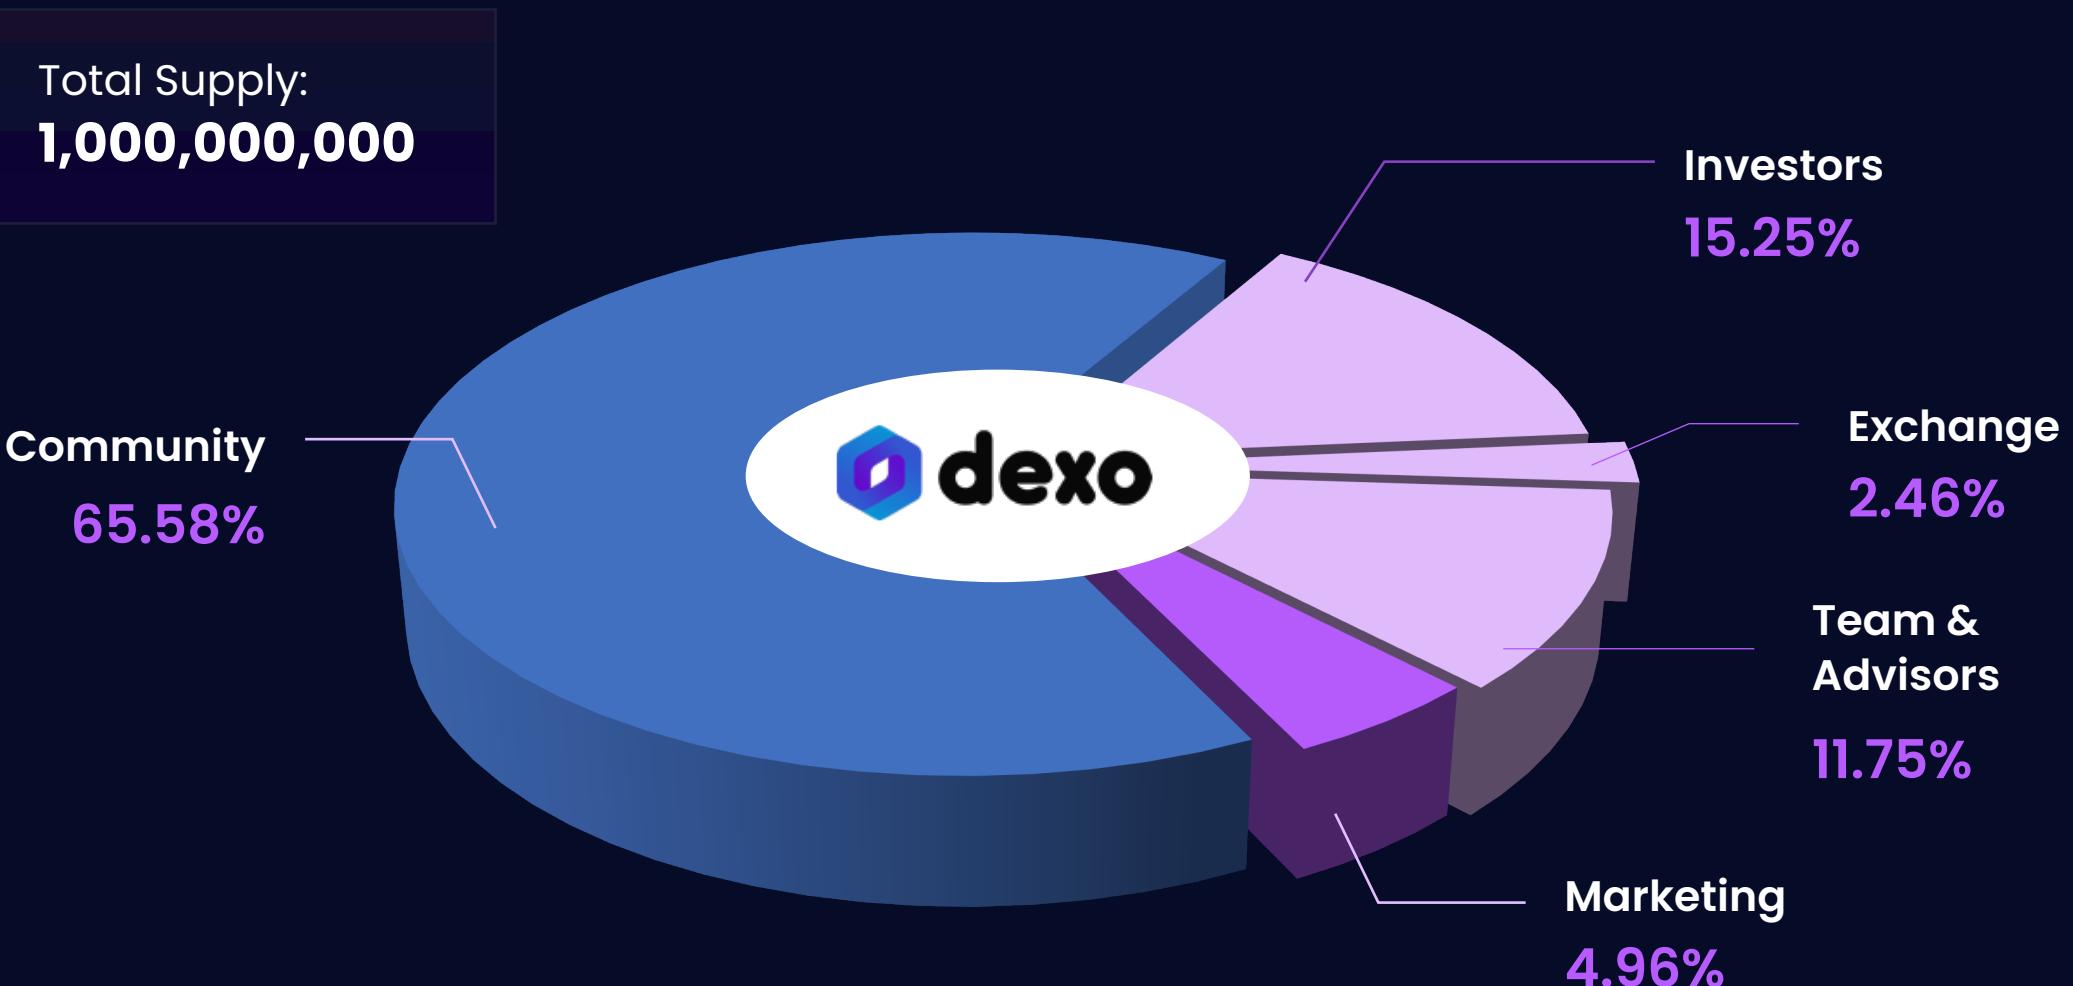

(b.) Platform fees from NFT trading

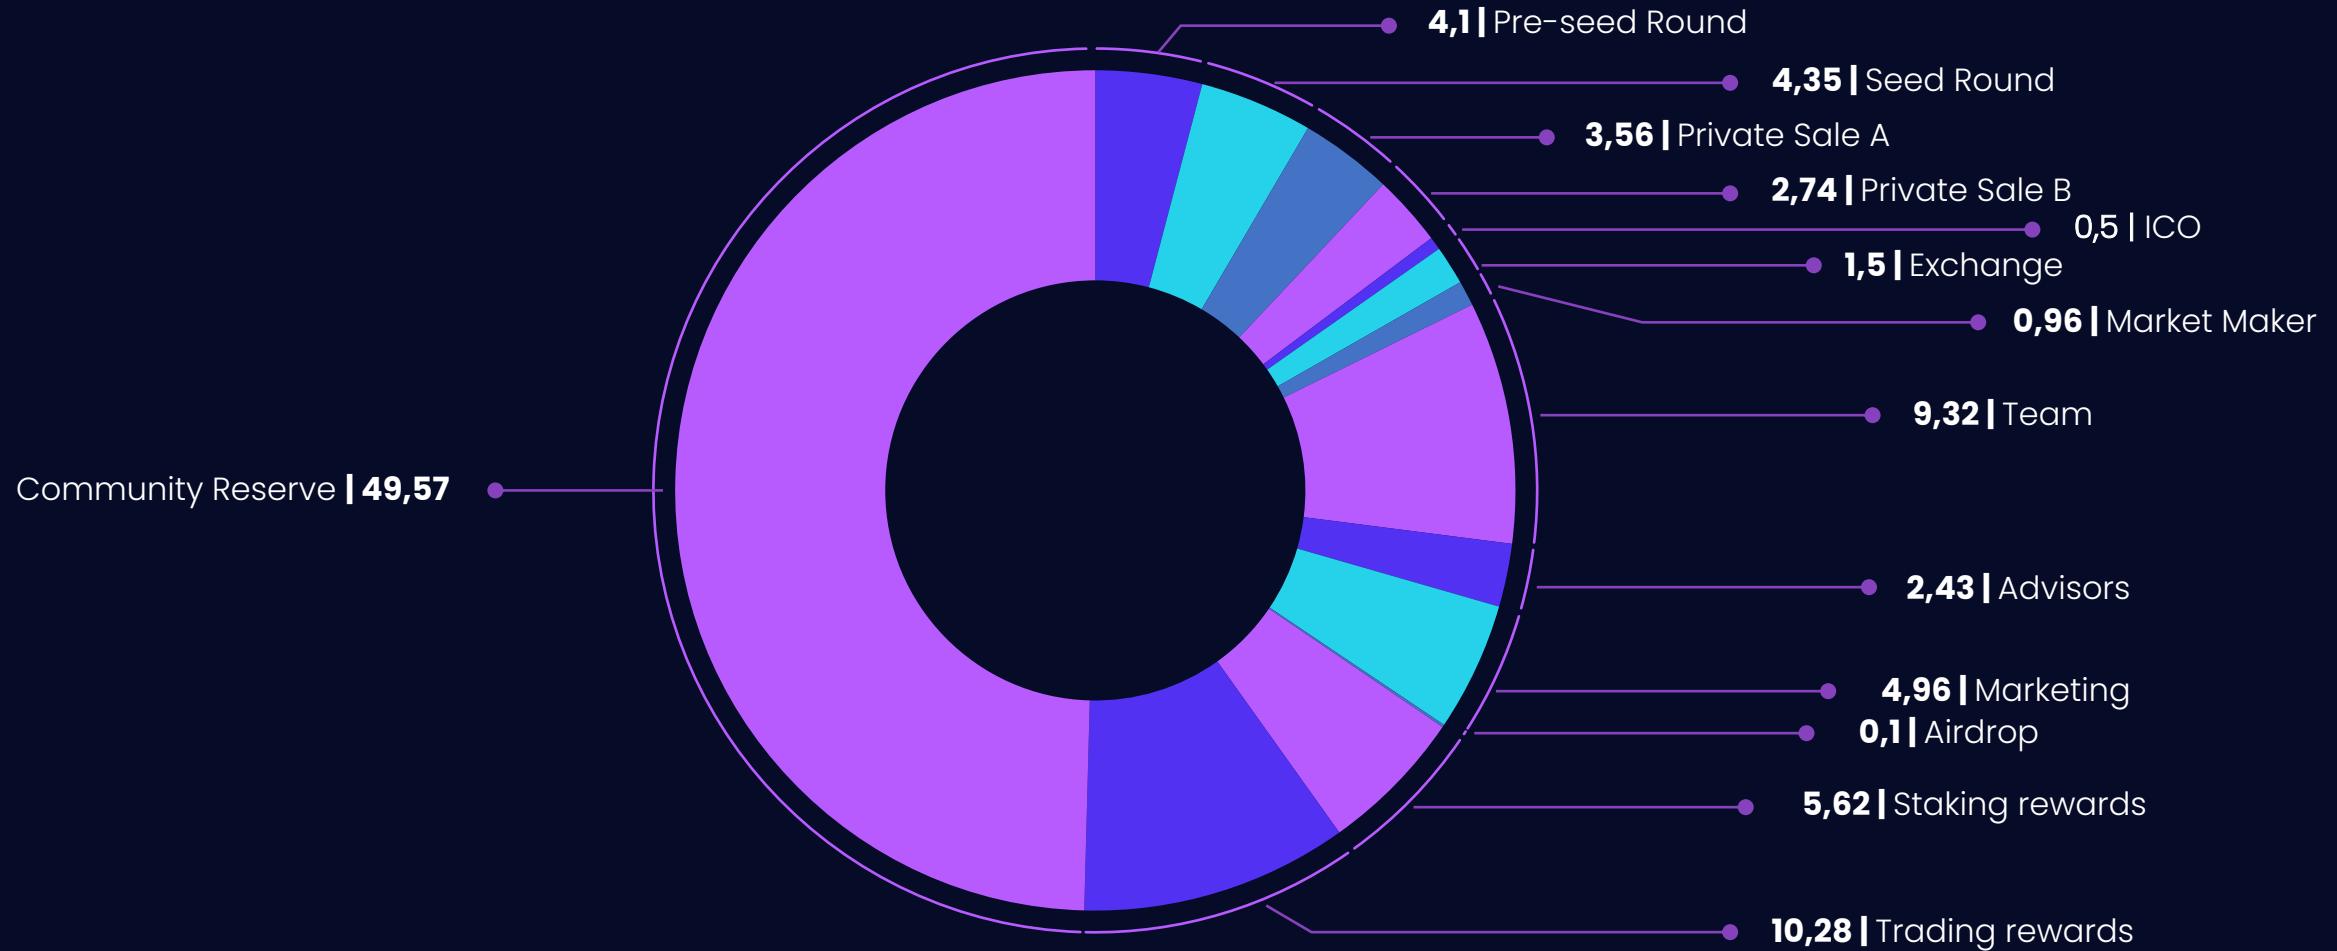

A fees of 0.50% will be charged as platform fees on each trade of NFT being listed on Dexo NFT marketplace.

Token Allocation

Token Allocation

Token Vesting Schedule

Category	Round	Allocation	Tokens (M)	Vesting
Investors	Pre-seed	4,10%	41,00	4.546% at TGE, equally released in 728 days on a daily basis
	Seed	4,35%	43,50	5.762% at TGE, equally released in 644 days on an alternate daily basis
	Private A	3,56%	35,60	8.284% at TGE, equally released in 80 weeks on a weekly basis
	Private B	2,74%	27,40	9.840% at TGE, equally released in 68 weeks on a fortnightly basis
	ICO	0,50%	5,00	Unlocked
Liquidity	Exchange	1,50%	15,00	
	Market Maker	0,96%	9,60	
Team and Advisors	Team	9,32%	93,20	1.779% at TGE, equally released in 24 months
	Advisors	2,43%	24,30	Equally released in 52 weeks effective from allocation
Marketing	Marketing	4,96	49,60	Equally released in 52 weeks effective from allocation
Community	Airdrop	0,10%	1,00	
	Staking Rewards	5,62%	56,20	
	Trading Rewards	10,28%	102,80	
	Community Reserve	49,58%	495,80	
	Total	100,00%	1000,00	

DEXO-Token Rewards

Total supply of staking rewards: 56,200,000

Reward Interval

- Calculated & distributed on a daily basis
- Unclaimed rewards will be compounded on a daily basis

Calculation

- Simple percentage of 27.33% on annual basis, subject to periodic change after 12 months
- APR: 31.416%

Total supply of trading rewards: 102,800,000

Reward Interval

- Fixed interval of 30 days

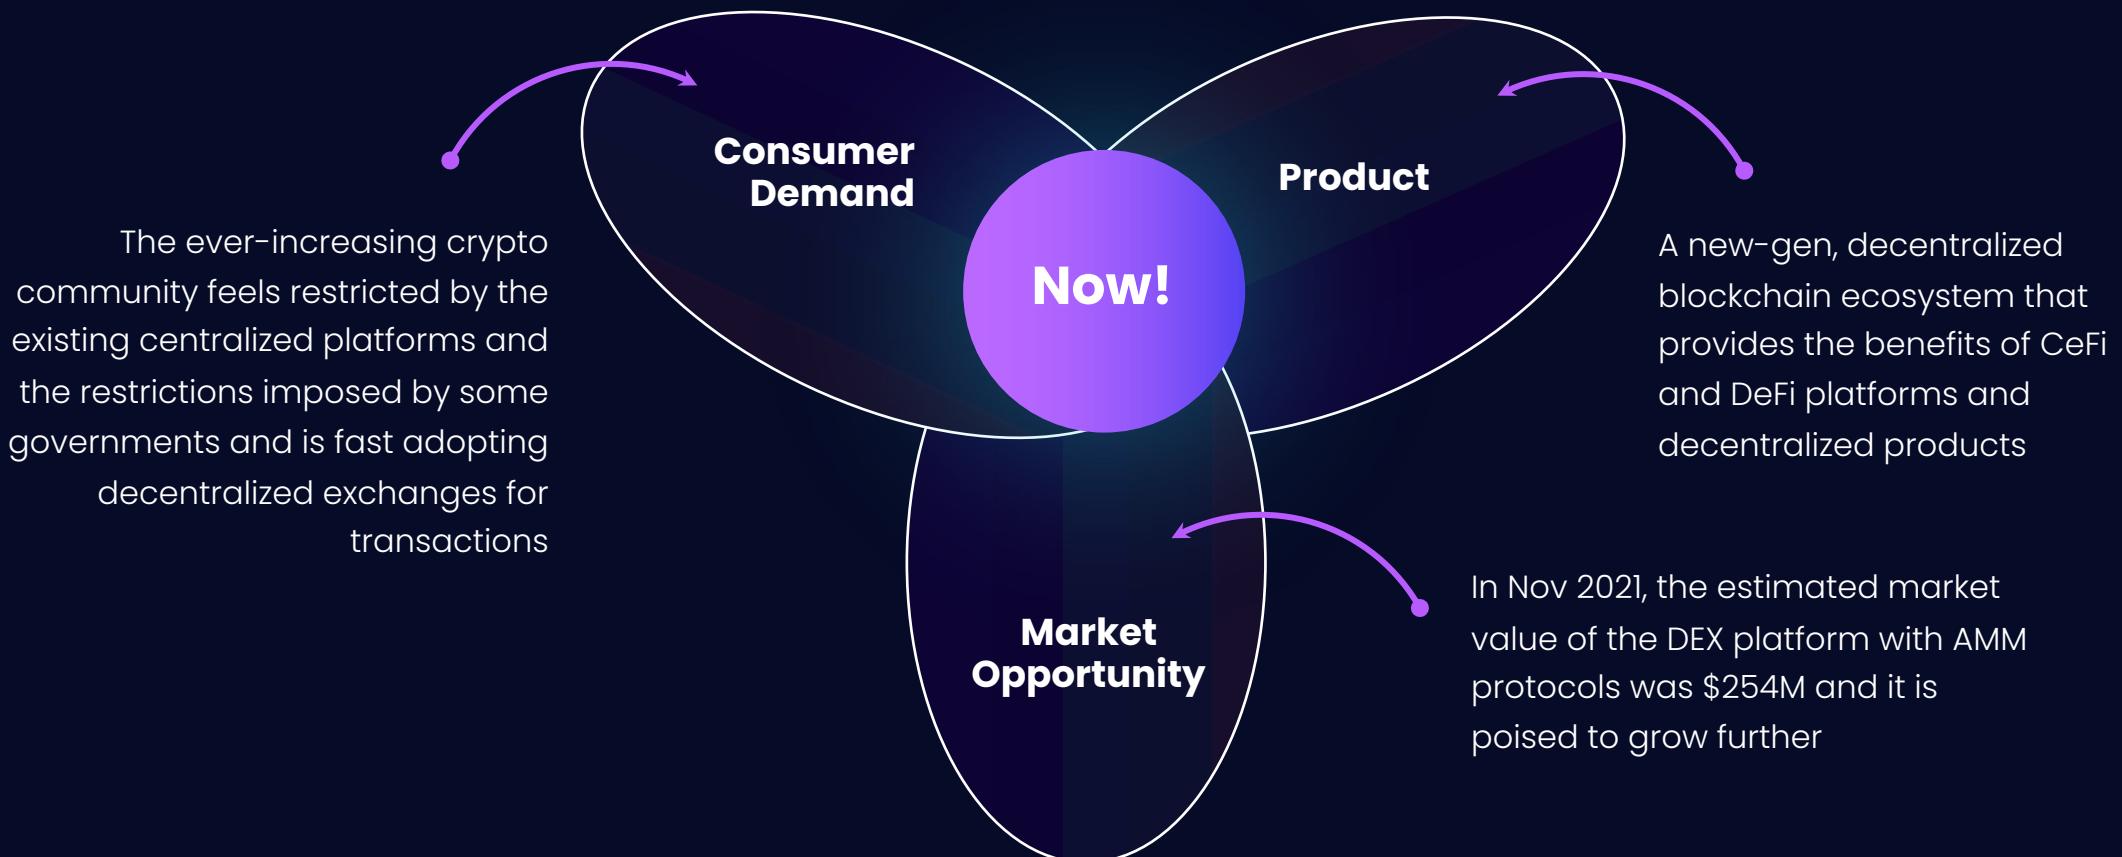

Reward Pool

Total Trading Volume	Reward Pool
Up to 1000	675,024
1001-2000	877,531
2001-3000	1,140,791
3001-5000	1,483,028
5001-7500	1,927,936

In case 100% of any specific rewards pool is not distributed, the remaining tokens will be burnt completely

The time is just right

It couldn't have happened earlier

We are disrupting the crypto and
NFT market
